

EDUCATION	Bachelor of Science in Electrical Engineering <i>J.B. Speed School of Engineering</i> University of Louisville, Kentucky	Expected December 2027
SKILLS	Technical Skills • KiCad PCB design and schematic capture • Tanner EDA (L-Edit, S-Edit, T-Spice) • VHDL, Vivado, Basys3 FPGA • Embedded C for STM32, ESP32, Arduino • SolidWorks; Nocti CAD Foundations Certificate, State Certification in computer-aided design Relevant Coursework • VLSI Design • Semiconductor Device Fundamentals • Electronics I & II • Logic Design and Lab • Network Analysis I & II and Lab • Electromagnetics • Computer Programming	
APPLIED EXPERIENCE	Custom Drone Flight Controller (STM32F405RGT6) • Designed a custom flight controller PCB around an STM32F405RGT6 in KiCad, carrying the concept forward from an earlier VTOL drone project into the current build. • Brought the board up in Betaflight and integrated an FS-i6X transmitter with an FS-IA6B receiver over i-BUS on the UART1 header, verifying live channel data. Currently in motor testing and frame integration. 10-bit Synchronous Up/Down Counter (FPGA) • Designed and implemented entirely in VHDL and run on the Basys3 FPGA board, changing its value between 0 and 1000 in response to the onboard switches and buttons.	2026 to Present
ENGINEERING EXPERIENCE	Gaylor Electric <i>Engineering Co-op, then Project Engineer (part-time)</i> • Built a Safety and Performance Token Initiative to track and incentivize jobsite safety performance. • Supported proposal budgeting, material procurement, and jobsite safety tracking on active electrical construction projects. • Developed AI automation tools using Microsoft Copilot Studio. Speed Center for Innovation (SCI) <i>Student Worker</i> • Managed the electronics workstation, providing technical support to students on soldering technique, circuit troubleshooting, and proper use of test equipment. • Assisted peers with component selection and debugging for embedded systems and PCB designs.	May 2026 to Present Sellersburg, IN January 2026 to May 2026 Louisville, KY
WORK EXPERIENCE	Engineering Living and Learning Community Peer Mentor <i>Speed School Student Success</i> • Assist first-year engineering students with navigating their classes and succeeding academically. • Hold two events per semester to drive student engagement.	January 2025 to Present Louisville, KY
ACTIVITIES & HONORS	Sigma Chi Fraternity, Tribune Chair Speed School Student Council, Director of Society Relations Institute of Electrical and Electronic Engineers (IEEE), Executive Officer Service Hours: Raise Red 2x (\$1500+ raised)
